You still need the Enforcement Addendum before you send off to Todd

Thanks,

Resending

So basically you see how Frank outlines it as separate actions (Copperweld, and WSH) – for us it doesn't matter it is the same site/property.

So when we address previous actions (Section II. B.1) and Potential for continued State/or local response (Section II.C.2) – we do not split them up

We can use Frank's email as a summary

In Section II.B.1 we need to add

The State had operated the WWTP and monitored the associated wastewater lagoons; sampled some of the piles located west of the Melt Shop; sampled, characterized and disposed of two piles of lime and mill scale (~50 tons) located west of Ohio Star Forge. (AR# (Franks Email))

And performed Property Management as outlined in the Copperweld Property Management Plan (AR#)

Section II.C.2 would read something like

The State continues to address ongoing remedial issues with the on-site landfills and lagoons under a Property Management Plan (AR# (the PMP))

The State will continue ongoing compliance and enforcement activities associated with the site (AR# (Franks email))

Steve:

The document you included is the Copperweld Property Management Plan (PMP). The PMP is directed towards the former Copperweld landfills (EAF and Rubbish) and the pickle liquor lagoons management. There is a distinction between WSH and Copperweld work. The Copperweld work involves the on-going remedial issues associated with the landfills and lagoons.

For the WSH site, the State had operated the WWTP and monitored the associated wastewater lagoons; sampled some of the piles located west of the Melt Shop; sampled, characterized and disposed of two piles of lime and mill scale (~50 tons) located west of Ohio Star Forge; and will continue on-going compliance and enforcement activities.

Contact me if you would like to discuss further.

Thanks, Frank

Hi Frank,

I am working with Jason Cashmere on the Action Memo for the site for the items we discussed (drums/totes/etc)

There is a section in it for

“State and Local Actions to Date” as well as “Potential for Continued State and/or Local Response”

I know OEPA is still performing work out there – is there a summary you can give me or if I summarize the attached document – would it capture everything?

Thanks,
